

Personalized MASTER FLAME FIRE PIT SCREENS

Master Flame brand Fire Pit Safety Screens can now be personalized with plasma-cut artwork and lettering along the bottom rim of the screen's frame. Available on PIVOT, LIFT OFF DOME or ROUND Fire Pit Screens, the lower rim of the framing is changed to a 2-inch wide steel bar.

Personalization Area

Artwork or lettering should be no longer than the diameter of the screen and not higher than 1.25 inches.

Email or fax us your design along with the size and fire pit screen style. We may have to adjust your artwork to fabricate. Before proceeding with the order, we will send a copy of what the final cut design will look like.
